

Up to 400 mW Uncooled 980 nm Pump Modules

H12 Series

The Lumentum H12 uncooled 3-pin low profile planar package pump laser employs 6570 flagship chip and advanced packaging design to significantly reduce the 980 nm pump's size and power consumption. It meets the telecommunications industry's stringent requirements, including Telcordia GR-468-CORE for hermetic 980 nm pump modules.

The H12 Series pump module, which uses fiber Bragg grating stabilization to lock the emission wavelength, provides a noise-free, narrowband spectrum, even under changes in temperature, drive current, and optical feedback. Wavelength selection is available for applications requiring the highest performance in spectrum control with the highest power available.

Key Features

- Operating power range from 200 to 400 mW
- 0°C to 75°C operating temperature (case)
- Ultra-small form factor: 14.0x4.8x3.2 mm
- Low power consumption
- Excellent low-power stability
- Fiber Bragg grating stabilization
- Wavelength selection available

Applications

- Small Form Factor and pluggable EDFA
- High bit-rate and high channel-count EDFAs
- CATV distribution

Compliance

- Telcordia GR-468-CORE

Dimensions Diagram and Pin Assignment

Package dimensions:

- Length (including boot and excluding pins): 14 mm
 - Pin length: 10 mm
 - Pin diameter: 0.45 mm
- Width: 4.8 mm
- Height: 3.2 mm
- Fiber Length: 1.6 m typical

Table 1 Absolute Maximum Ratings

Parameter	Symbol	Minimum	Maximum	Units	Notes
Forward current	If		1.2	A	1 hour maximum cumulative
Reverse voltage	Vr		2	V	
Reverse current			10	μA	
ESD damage	VESD,LD		500	V	C=100pF, R=1.5kΩ, HBM
Operating temperature		0	75	°C	
Storage temperature		-40	85	°C	
Relative humidity	RH	5%	95%		
Lead soldering temperature			350	°C	T case at 25°C
Lead soldering time			5	s	
Tensile stress			5	N	
Fiber bend radius		16		mm	

Absolute maximum ratings are the maximum stresses that may be applied to the module for short periods of time without causing damage. Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. Exposure to absolute maximum ratings for extended periods of time or exposure to more than one absolute maximum rating simultaneously may adversely affect device reliability. Specifications may not necessarily be met under these conditions.

User Safety

Safety and Operating Considerations

The laser light emitted from this laser diode is invisible and may be harmful to the human eye. Avoid looking directly into the fiber when the device is in operation.

CAUTION: THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT INCREASES EYE HAZARD.

Operating the laser diode outside of its maximum ratings may cause device failure or a safety hazard. Power supplies used with this component cannot exceed maximum peak optical power.

CW laser diodes may be damaged by excessive drive current or switching transients. When using power supplies, the laser diode should be connected with the main power on and the output voltage at zero. The current should be increased slowly while monitoring the laser diode output power and the drive current. Careful attention to heat sinking and proper mounting of this device is required to ensure specified performance over its operating life.

ESD PROTECTION—Electrostatic discharge (ESD) is the primary cause of unexpected laser diode failure. Take extreme precaution to prevent ESD. Use wrist straps, grounded work surfaces, and rigorous antistatic techniques when handling laser diodes.

Labeling

Laser Safety

The Lumentum pump laser module emits hazardous invisible laser radiation.

Due to the small size of the pump module, the box packaging is labeled with the laser radiation hazard symbol and safety warning labels shown
